

Figure 1. Distribution of 1000 simulated data points. The points are clustered in a ring-like pattern, indicating a non-uniform distribution.

the data. The results of the simulation are shown in Figure 1. The points are clustered in a ring-like pattern, indicating a non-uniform distribution. This is consistent with the results of the simulation, which show that the data points are clustered in a ring-like pattern.

The results of the simulation are shown in Figure 1. The points are clustered in a ring-like pattern, indicating a non-uniform distribution. This is consistent with the results of the simulation, which show that the data points are clustered in a ring-like pattern.
